kribu

WORKS ACROSS DEPARTMENTS

How it solves real problems.

Kribu Brain works across departments, and agents built by one team can be reused by another.

- Finance & Accounts
- Sales & Marketing
- HR & Administration
- Operations & Supply Chain
- Customer Service & Support
- Management & Leadership

HOW WE HELP YOU BECOME AI-NATIVE

01

Discover

Map your workflows, agree data access and governance rules, and choose your model setup.

02

Train

Hands-on workshops. Your team designs and improves agents in plain language.

03

Build together

Our engineers build your first agents with your team and connect them to your tools.

04

Scale & own

Your team rolls agents out to new departments. We stay on as advisors.

NEXT STEP

Book your strategy session.

We'll map where AI can take the load off your team first.

A KRIBU PRODUCT

Kribu Brain.

YOUR COMPANY'S SUPER BRAIN.

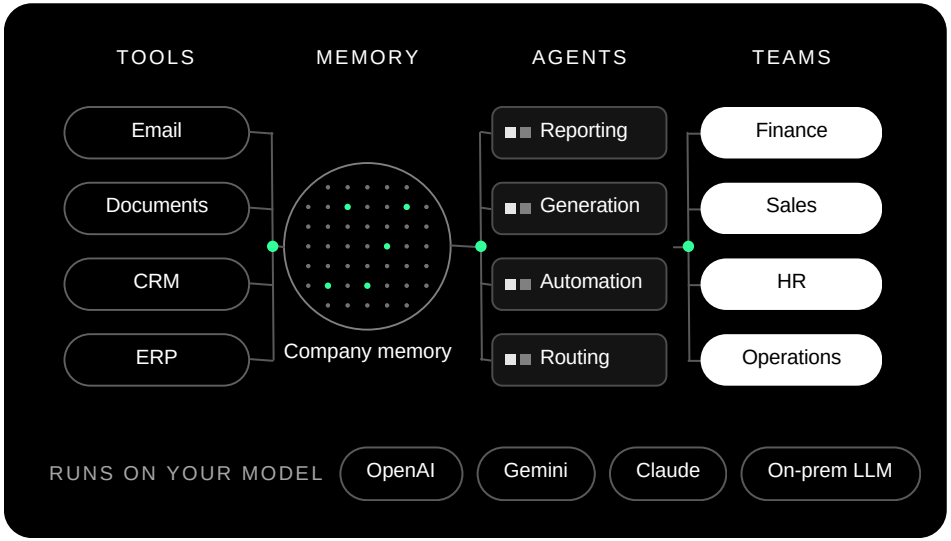

AI sovereignty for growing businesses:
your knowledge, your rules,
your data, your model.

- Book a strategy session at kribu.ai

THE PLATFORM

Build an AI-native company. Without the enterprise sprawl.

Kribu Brain connects to the tools you already use, remembers how your company works, and lets AI agents carry out multi-step work for your teams, all within the rules you set. Each agent is built from skills: small, reusable steps any team can combine.

WHAT YOUR BUSINESS GAINS

Your people on high-value work

Agents handle reporting, data gathering and follow-ups.

Faster onboarding

New hires learn from agents that show how you work.

Knowledge that stays

Know-how stays in the agents when someone moves on.

No vendor lock-in

Use the AI subscription you have, or run open-source models. Switch anytime.

Control and compliance

You decide who sees what, and every decision is traceable.

Grow without the overhead

Take on more customers and orders without adding headcount at the same pace.

KRIBU BRAIN VS. THE ALTERNATIVES

Make the whole company smarter.

Frontier AI platforms

ChatGPT, Claude, Gemini and similar

- × Each use starts fresh
- × No governance layer
- × No audit trail
- × Easy to copy
- × Tied to one vendor

Custom engineering

In-house builds or consultants

- × Expensive and slow
- × Engineering bottleneck
- × Governance scattered
- × Hard to scale
- × Locked into custom code

Kribu Brain

● Your company's AI operating layer

✓ Agents that compound	Every workflow becomes a reusable agent that improves as your team uses it.
✓ Governance built in	Role-based access, data policies and clear ownership from day one.
✓ Complete audit trail	Who ran which agent, when, on what data, and what the outcome was.
✓ An advantage you own	Your processes and know-how, captured as assets competitors cannot copy.
✓ Any model, no lock-in	OpenAI, Gemini or Claude, or open-source models on-prem. Switch anytime.

COMPLEMENTARY PRODUCTS

KRIBU Docs

Document processing, extraction, comparison and generation for contracts, proposals and reports.

KRIBU Notes

Meeting transcription and summaries, with decisions and action items tracked.

KRIBU Mailsmart

Email classification, summaries and response drafting, so important messages never slip.
